Monthly Project Update

MORGAN SINDALL CONSTRUCTION

Welcome to the Stevenage Leisure Centre Project

Introduction

Hello, I'm Maurice Wilson, Senior Project Manager for Morgan Sindall Construction, and I wanted to share with you the latest news on the Stevenage Leisure Centre project that is currently being constructed in your local community. We are proud to be involved in delivering this fantastic new facility in partnership with Stevenage Borough Council.

Additionally, just a reminder, the existing pool remains open throughout the duration of the construction works.

I hope you find this information useful and if you have any questions, please feel free to reach out on the email address I have provided at the end of this newsletter.

Project Key Facts

- 25-metre, 10-lane swimming pool
- Seating for 150 spectators
- Teaching pool
- Splash pad
- Soft play area
- Six-court sports hall
- Fitness suite
- Multi-purpose studios
- Café

Community Engagement

Current and proposed future community engagement initiatives:

- Newsletters throughout duration of works
- Work placements
- Construction careers Information Advice & Guidance Events
- Support unemployed People with Employability Workshops
- Open doors collaborative opportunities with local schools and colleges
- Support initiatives that support or encourage health and wellbeing in the wider community

Project Microsite

A Project Microsite has been created to keep you informed during construction and is available via the QR code below. This website provides links to FAQs and we will be keeping you updated as work progresses on site.

Construction Update

Works are progressing at pace on the fantastic new leisure centre. Piling works are now complete and we are progressing with the substructure works. Taking shape as part of these works is the new 10 lane, 25m swimming pool which will have a moveable floor, and will be just one of the key highlights of this exciting new facility for Stevenage.

Our tower crane has now been erected, which is a significant milestone and is now visible across the Stevenage Town Centre skyline.

We will be progressing with the remaining substructure and reinforced concrete (RC) structural frame over the next few months, as the building will gradually start to emerge above the hoarding line.

To facilitate these works a small section of the adjacent Stevenage Town Centre Gardens park will be segregated and utilised as a temporary storage area for excavated material, which will be fully reinstated by 01 March 2027.

The site is registered with the Considerate Constructors Scheme (CCS), which is an independently audited assessment of a project's consideration for the local community, its operatives, and the environment. As part of our commitment, we do what we can to minimise any potential disruption arising from the project. We recently had our first audit and achieved a 97% score, which is an excellent achievement.
